3.20 Driveways and Sidewalks.

A. Each Lot and/or Unit must be accessible to an adjoining street by a driveway suitable for such purposes before the residential structure located on any such Lot may be occupied or used.

B. Location of the driveway on the Lot must not interfere with the location of electrical transformers within servitudes along the various property lines of the Lot. No driveway shall be constructed without the prior written approval of the Architectural Review Committee as to its location, which said location shall not be located nearer than three (3') feet to any side Lot line.

C. Driveways shall be connected to a street and shall be constructed at a minimum of concrete. Concrete driveways shall have expansion joints not more than twenty (20') feet apart, with one joint at the back of street curb. The minimum width of a driveway shall be twelve (12') feet and the maximum width shall be twenty-four (24') feet. The width of the driveway at the street curb shall widen to a minimum of fifteen (15') feet and a maximum of twenty-five (25') feet (not to encroach past any side property line extension); the driveway shall be at least four (4") inches thick and shall be poured against a horizontal form board at its end toward the street curb.

D. Walkways on the Lot going from the street curb or driveway to the single-family dwelling shall have a minimum width of three (3') feet and shall be constructed of material approved by the Architectural Review Committee. No walkway shall be closer than three (3') feet to the side yard. The Owner shall at all times maintain and keep said walkways in good condition and repair to the quality and type of the original construction and shall indemnify and hold harmless the Association for any causes of action, damages, claims, liability or monies spent, including attorney's fees, court costs and costs of defense, arising out of or in any way connected with the failure of

the Owner to maintain the said walkways in good condition and repair as required herein.

3.21 Utilities. Each residence situated on a Lot shall be connected to the water and sewer lines as soon as practicable after same are available at the Lot line.

3.22 Mail Receptacles. All mail receptacles must be of the same design, material and paint color as approved by the Architectural Review Committee and shall be constructed, placed and maintained on the Lot and/or Unit in accordance with guidelines provided by the Architectural Review Committee from time to time. Specifications, prices, and place of purchase will be provided by the Architectural Review Committee before installation.

3.23 Fences/Walls. No fence and/or wall shall be erected on said Lot beyond the front building setback line of that Lot. No fence and/or wall shall be erected beyond the front facade and/or front loading garage facade of the home, provided, however, that fencing and/or walls that are part of the original design and construction of the home may be located no greater than five (5') feet beyond the front facade and/or front loading garage facade of the home. Chain link fences are not allowed. No fence or wall shall be constructed, placed, maintained or erected on any Lot and/or Unit without the prior written approval of the Architectural Review Committee as to its location, height, and type of material.

Unless otherwise approved by the Architectural Review Committee, the rear yard fence paralleling the rear property line must be setback a minimum of five (5') feet off of the waters edge (based on normal lake level) for waterfront lots and may be placed on the rear property line for all other lots. Further, the rear yard fence paralleling the rear property line shall be a maximum of six (6') feet in height and must be a black open iron or ornamental aluminum fence with pickets

four (4") inches apart as approved by the Architectural Review Committee. The side yard fence perpendicular to the rear property line thirty-five (35') feet from the rear yard waters edge (at normal lake level) for waterfront lots and the rear property line for all other lots, must be a black open iron or ornamental aluminum fence with pickets four (4") inches apart not to exceed six (6') feet in height as approved by the Architectural Review Committee. The fencing from that point to the front building setback line may be solid and shall not exceed six (6') feet in height and shall be of a material approved by the Architectural Review Committee if not a black open iron or ornamental aluminum fence.

3.24 Landscape Requirements and Restrictions.

A. Landscaping shall be installed within thirty (30) days of substantial completion of the residence on the Lot. The following are the minimum landscape requirements per Lot and/or Unit:

1. The Owner will be required to plant specimen trees of not less than 2-1/2 inch caliper (diameter is measured 12" above the ground), 10-12 feet tall and with a 4-6 feet spread. The density of planting will be a minimum of one (1) tree per five hundred (500) square feet of one-fourth (1/4) of the land area of the Lot. This is a minimum requirement. The number of trees also will be determined by the size of the trees planted. Planting larger trees will reduce the total number required. Credit will be given for existing trees. Multi-trunk trees will have as a minimum 3-5 trunks, be 8-10 feet tall and have a 4-6 foot spread.

Example:

Lot Land Area:	11,200 square feet
1/4 Lot Land Area Equals:	2,800 square feet
Divide by 500 Equals the Minimum	
Number of Trees Required	6

2. Fifty percent (50%) of these trees must be planted in the front yard with the remaining fifty percent (50%) planted in the side and rear yards.

3. The Owner must plant a minimum of fifty (50) shrubs (3 gallon in size) of which fifty percent (50%) are to be planted in the front yard with the remainder to be planted in the side and rear yards.

Sizes of plant material will be based on criteria established in the "American Standard for Nursery Stock," by the American Association of Nurseryman, Inc., the latest edition. Based on a bed area of four hundred (400) square feet with fifty (50) three (3) gallon plants spaced thirty-six (36") inches on center, the following chart illustrates acceptable equivalent choices:

One 7-Gallon Shrub	=	Three 3-Gallon Shrubs
One 5-Gallon Shrub	=	One and One-Half 3-Gallon Shrubs
One 3-Gallon Shrub	=	One 3-Gallon Shrub
Two 1-Gallon Shrubs	=	One 3-Gallon Shrub
Three and One-Half 6" Pot Shrubs	=	One 3-Gallon Shrub
Nine 4" Pot Shrubs	=	One 3-Gallon Shrub

4. All front, side and rear yards shall be one hundred percent (100%) solid sodded with centipede or equal grass.

5. No trunk forming a palm tree (any specimen type)

exceeding four (4') feet in height shall be allowed on the Lot. Palm trees (any specimen type) shall not be considered as a tree for the plantings required in Sections 3.24(A) (1) and 3.24(A) (2).

B. If the Lot or Unit Owner defaults, then the Architectural Review Committee may cause the work to be performed and shall be paid a

reasonable charge for such services by the Owner of the Lot and/or Unit immediately upon the request therefor. If the Owner fails to pay said charge, then said charge shall become a lien and a special assessment and the Owner shall be responsible for paying the same and any costs and attorneys fees for collection thereof or associated therewith.

3.25 Drainage.

A. No Owner shall in any way interfere with or alter the established drainage pattern of water over his Lot or interfere with drainage over and through any drainage servitude on his Lot. For purposes of these restrictions, the "established drainage pattern" is defined as the drainage pattern which is designed to occur at the time at the overall filling and grading of the Subdivision and the Lots in the Subdivision have been completed in accordance with the requirements of these restrictions and in accordance with the Master Paving and Drainage Plan prepared by Wink, Incorporated, and the Site Grading Plan prepared by Wink Incorporated, which plans have been submitted by Developer to the St. Tammany Parish Planning Commission. Copies of said plans are also filed in the Official Records of St. Tammany Parish, Louisiana and with the Architectural Review Committee.

B. In order to achieve the established drainage pattern, each Owner shall be responsible to grade, elevate and fill his Lot in accordance with and as required by these restrictions and the Site Grading Plan. Each Owner shall also be responsible to maintain the elevation of his Lot so that water shall drain over and through his Lot in accordance with the established drainage pattern for his Lot as provided herein and as shown on said Site Grading Plan.

C. The maximum slope of any and all lots within the Subdivision shall be 4:1.

3.26 Restrictions for Waterfront Lots. Any Lot which shall abut upon any lake, canal or other waterway (hereinafter collectively referred to as "Waterways") shall be subject to the following additional restrictions:

A. Only a deck, boardwalk and/or bulkhead shall be constructed or maintained upon any Lot abutting Waterways within the rear yard setback with the prior written approval of the plans, specifications and location by the Architectural Review Committee. Decks cannot be constructed into the water. Such structures constructed by the Owner shall be maintained, repaired and/or replaced at his sole expense. There shall be no hanging of tires, or other obstructions on any deck, boardwalk and/or bulkhead.

The maximum height of a deck constructed at the waters edge shall be forty-two (42") inches from normal water level to floor of deck; the deck must be trimmed and skirted (with vertical boards on three sides to resemble a bulkhead); all steps must be trimmed; the deck may contain a maximum of 200 square feet (walks/steps to deck from rear yard setback are part of the total square footage); the deck shall be set back ten (10') feet off of each side yard; railings, if necessary, shall be open in design and shall comply with the height requirements of the Parish of St. Tammany.

The maximum height of a deck constructed five (5') feet off the waters edge at normal lake level or further inward to the rear setback line shall be forty-two (42") inches from existing ground elevation to floor of deck; the deck must be trimmed and skirted; all steps must be trimmed; the deck may contain a maximum of 200 square feet (walks/steps

to deck from rear yard setback are part of total square footage); the deck shall be set back ten (10') feet off of each side yard; railings, if necessary, shall be open in design and shall comply with the height requirements of the Parish of St. Tammany.

The maximum height of a boardwalk shall be forty-two (42") inches above normal lake level; there must be a bulkhead running the entire width of the property and the ends of the bulkhead must turn back into existing grade; the maximum width of the boardwalk shall be four (4') feet.

The maximum height of a bulkhead shall be forty-two (42") inches above normal lake level; the bulkhead shall include tie backs on five foot centers or as approved by the Architectural Review Committee; the ends of the bulkhead must turn back into existing grade.

B.

No launching facilities for a boat from its trailer, boat ramps, or any similar type of structure(s) or equipment shall be installed, constructed or maintained upon any Lot. No boat trailer shall be stored on any Lot except in a permanently enclosed structure as designated in Section 3.4 herein. C. Declarant, its successors or assigns shall not be responsible for the erosion of any Lots caused by the waters of any lake, waterways, canal or drainage servitude area.

3.27 Swimming Pools.

A. Swimming pools, patios and decks shall be located on the rear portion of the Lot. Notwithstanding the provisions of Article III, Section 3.1, swimming pools, patios and decks shall not be nearer than twenty (20') feet, at normal lake level, to the water's edge for waterfront lots or twenty (20') feet to the rear property line for all other lots, however, a walkway attached to the swimming pool may be placed within this twenty (20') foot setback, with said walkway not to

exceed four (4') feet in width.

B. Swimming pools, patios and decks shall be constructed in the ground and shall be at normal ground level. No above-ground pools shall be allowed.

C. A fence of a design approved by the Architectural Review Committee, and in compliance with St. Tammany Parish regulations, shall completely enclose any swimming pool.

3.28 Clotheslines. Outdoor clotheslines or other outside facilities for airing or drying clothes are specifically prohibited and shall not be erected, placed or maintained on the Lot and/or Unit. No clothing, rugs, or other items shall be hung on any railing, fence, hedge or wall.

3.29 Multiple Lots.

A. Nothing in these restrictions shall prohibit an Owner of any two (2) adjoining Lots having frontage on the same street from erecting a residence on the two (2) Lots, which shall be considered, for the purpose of these restrictions, more particularly for assessments, as two (2) Lots, even if said Lots are resubdivided into one (1) larger Lot.

B. No Lot or Lots shall be sold except with the description as shown on the original plan of subdivision referred to above, or any revisions or amendments thereto; provided, however, that any Lot or Lots may be subdivided or re-platted with the prior written consent of the Declarant or the Architectural Review Committee.

ARTICLE IV

WATERWAYS RESTRICTIONS

4.1 Use of Boats. Boats shall not be permitted to use the

Waterways within the Subdivision. Neither the Declarant nor the Association shall be liable or responsible for any death, accident or injury as a result of violation of this restriction.
